PROFESSIONAL SUMMARY

- Technical engineer with experience building assessment platforms, internal productivity tools, GenAI workflows, and client-facing technical evaluation content across full-stack, SQL, automation, and cloud environments.
- Strong background in production support, Django-based systems, cloud-based query optimization, database querying, and AI-assisted development using ChatGPT, Claude Code, and Cursor.

SKILLS

Languages	Python, Java, JavaScript, SQL, HTML/CSS
Frameworks	Django, Spring Boot, Angular, Flask
Cloud & Engineering Tools	AWS, Docker, Terraform, Git, Selenium, HubSpot
Data Stores	MySQL, PostgreSQL, MongoDB, SQLite
AI & Productivity Tools	ChatGPT, Claude Code, Cursor, prompt engineering, AI-assisted code generation and review

EXPERIENCE

HackerEarth - Senior Technical Engineer	July 2025 - Present	Bengaluru, India
• Lead platform development and production support, reducing critical incident resolution time by 40% through monitoring scripts, faster triage, and rapid on-call response with 95% SLA adherence. • Architect internal tools that improve Content, Engineering, and Support team productivity by 30% through workflow automation, dashboards, and reusable operational utilities. • Resolve complex customer and platform issues involving Django, cloud-based query optimization, database queries, OAuth, session management, access control, and security vulnerabilities. • Manage deployment validation, rollback planning, and QA automation contributions across assessment and support workflows without compromising production stability.		
HackerEarth - Technical Content Engineer	Aug. 2023 - July 2025	Bengaluru, India
• Created 2,700+ technical assessments, including 500+ full-stack tasks, 2,000+ MCQs, and 150+ SQL, Selenium, and DevOps tasks for clients such as Razorpay, Flipkart, Deloitte, and Meesho. • Pioneered UI element testing in Full Stack Question Type, enabling product deprecation of Frontend QT and improving assessment maintainability. • Built a GenAI Prompt Playbook and AI-assisted MCQ generation workflow, reducing content creation time by 60% through prompt-driven summaries, review checks, and structured outputs. • Delivered high-impact custom projects including Razorpay Gitter VCS, Deloitte banking application, and Flipkart Spring Boot task management solution. • Introduced and enhanced multiple platform technology stacks including Cucumber, Terraform, Selenium, Angular integration, and Android local development support.		
HackerEarth - Technical Content Engineer Intern	Aug. 2022 - Jun. 2023	Bengaluru, India
• Completed a 9-month internship supporting technical content development, assessment validation, and quality review workflows across programming, SQL, and automation-based tasks. • Assisted in creating and reviewing hands-on assessments, test cases, and candidate evaluation content for client-facing technical hiring workflows.		

PROJECTS

Skill Assessment Suggestor - HackerEarth	AI + Assessment Design
• Developed an AI-assisted assessment recommendation workflow that analyzes a job description and existing role skills to suggest a structured assessment blueprint with sections, skills, difficulty mix, and task formats.	
Team Work Analytics Dashboard	Dashboard & Reporting
• Created a team productivity dashboard that tracks work items, ownership, completion status, trends, and performance insights using analysis views, visual graphs, and summary reporting.	
Gitter Version Control System	Java, Python
• Implemented a lightweight Git clone in Java and Python with branching, merging, commit history, file staging, and SHA-1 hashing for version tracking.	
Microservices Blog Application	Spring Boot
• Architected a Spring Boot microservices application with independent blog, comment, and reaction services, separate data stores, and RESTful API communication.	

EDUCATION

K L University	Jun. 2019 - May 2023	Andhra Pradesh, India
• Bachelor of Technology in Computer Science CGPA: 9.12/10.0 • Specialization: Data Science and Big Data Analytics
